Sunday School & Bible Class 2 p.m.

Preaching Service at 7.30 p.m.
Does God change things? Has Christianity anything to do with politics? Is the present disturbed world a challenge to us to become atheists, and fight our own battles? These and other questions of vital importance will be dealt with by the Pastor, Rev. R. K. Swenerton in his Sermon next Sunday.

The Ladies Aid of the Union Church are holding a Bazaar and Sale of Cooking, on or about Dec. 15th, and are asking for donations from all the different branches. Do your best to help make this Bazaar a success.

Women's Institute Library.
Notice to subscribers. All books must be returned by Nov. 1st, when the Library will be closed for the Annual listing. Re-opening on Saturday, Nov. 8th. New books are constantly being added and a catalogue will shortly be ready.

Natural Salt
Beds in Alberta

Drilling for salt at Fort McMurray, Alberta, has just been commenced, according to an official of the Department of Mines.

An estimate, with seven men, has just been sent in by the Provincial Government. The deposit underlies the town of Fort McMurray, so is feasible from the transportation standpoint.

According to previous investigations, there is a bed 180 feet deep, lying 480 feet under the surface. Professor Allan, of Alberta, was sent in by the Provincial government a couple of months ago, and he reported very favourably.

It is not decided whether the government will mine salt, supposing everything is as expected, or whether it will turn the work over to a company.

Amber Monopoly Gone

Amber is Lithuanian. The Lithuanian shore of the Baltic Sea is the only district in the world where the collecting and digging of amber is a practical industry. Practically all the products of amber—the necklaces, cigarette and cigar holders, buckles, buttons, pipe stems and hatpins, which are seen every day in the shops of the world—are really Lithuanian in that they came from Lithuanian soil.

During modern years this industry has been closely guarded as a Prussian government monopoly. In the future, with Lithuania a republic, this industry can be greatly expanded with considerable profit, despite the fact that amber is one of the few things in the world which has diminished in value during recent years.

Baltic amber is not only collected along the shore, but it is mined from the so-called "blue earth" layers of the tertiary period well into the interior of Lithuania.

Excavations in Greece, Italy and Egypt have shown that Baltic amber was famous hundreds of years before the Christian era. Herodotus wrote of it, and beads, which the ancient Lithuanians must have bartered, were discovered in the Grecian ruins of Mikena, dating back to 1,500 B.C.

MRS. M. SUMMERS, Box 965 Windsor, Ont.

representation. They were compelled to be content with criticizing the work of the council from outside, and much of their criticism was justified, for, as is often the case when the constitution of the council is one-sided, the administration was not of a high order. The corporation, however, labored under difficulties. Its powers of assessment and taxation were limited. It inherited a considerable debt. Burdens imposed by the council continued to increase. Eventually the crash came. The corporation was bankrupt. The streets were, for a time, neither repaired nor swept and the street lights were not lit. As a result, there sprang into existence a vicious Ratepayers' Association, in which many members of the hitherto unrepresented minority took a prominent part. The ratepayers' challenged the action of the council in striking a rate in excess of its powers. Finally, a new municipal

ward, the day is wet and cold, and unless the mother is on her guard the little ones are pined with colds that may hang on all winter. Baby's Own Tablets are mother's best friend in preventing or lessening colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose will prevent colds, or if it does come on suddenly the prompt use of the Tablets will quickly relieve it. The Tablets are sold by medicine dealers, or by mail at 25 cents a box, from The Dr. Williams' Medicine Co., Brockville, Ont.

There is one good feature about breaking up housekeeping; it enables people to get rid of their old furniture.

Too Much Political Craft

Many say it can't be prevented, neither can wars or corn; but they can be cured by Putnam's Corn Extractor. It cures corns and warts without pain in twenty-four hours. Use only Putnam's, 25c at all dealers.

The Salaried Man

Bill Introduced to Remove Restrictions as to Age

London, England.—An interesting paragraph in the August number of the International Woman Suffrage News stated that the Icelandic Government has introduced a bill into the Althing for the amendment of the Constitution in such a way as to give equal political suffrage for elections in districts to all men and women of 25 years, while 35 years is to be the qualifying age for elections of both sexes for elections to the Upper House. It is considered certain that this amendment will be passed, in which case the elections will take place in the spring. Four years ago the Icelandic women were enfranchised, subject to certain restrictions as to age, which the amendment bill now before the Althing will remove.

If it were possible to put all the land on the globe above water level in the Pacific Ocean only one-seventh of the latter would be covered.

The repartee you think of when it is overwhelmingly too late to work off may save a friend.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Neuralgia, Toothache, Headache, Earache, and Rheumatism, Lumbago, Sciatica, Neuritis, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real Aspirin—the genuine Aspirin prepared by physicians for over fifteen years. Now made in Canada.

Handy tin boxes containing 10 tablets cost but a few cents. Sample Aspirin is an unbroken "Bayer" package.

There is only one Aspirin—"Bayer"—You must say "Bayer" Aspirin is the trade mark (registered in Canada) of Bayer Manufacturers of Non-narcotic drugs of Balingenstadt. While it is well known that Aspirin means Bayer manufacturers, and the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

"I Hope Every City and District Will Win My Flag"

When Edward, Prince of Wales—eager, bright eyed, smiling and sincere—arrived in Canada in August, and when he voiced his great admiration of the wonderful achievements of Canadians, on the fields of battle and at home, once again we were thrilled with joyous pride.

He asked concerning Canada's reconstruction programme, and when he was told of the Victory Loan 1919, he graciously consented to the use of his Coat of Arms on a flag, which is to be the prize of honour for districts achieving their quota in the loan.

In dedicating "The Prince's Flag" at Ottawa on Labor Day, His Royal Highness said in part:—

"It is a great joy to me to be associated with the loan, which is the bridge between war and peace, and which is finishing off the job."

"I hope every city and district will win my flag." Striking, and beautiful in design, this flag will form not only an unique memento of Victory Year, but a lasting and outstanding souvenir of the visit of His Royal Highness—a visit which will remain as one of the most memorable events in Canada's history.

The reproduction above shows the design of the flag. The body is white, the edge red; in the upper left hand corner is the Union Jack, and in the lower right hand corner the Prince of Wales' Coat of Arms.

The flag is made in two sizes, 4 feet 6 inches by 9 feet for small cities, towns and villages, and 7 feet by 13 feet 6 inches for cities of over 10,000 population.

Canada has been divided into canvassing districts by the Victory Loan Organization. Each city forms one district. Other districts have been determined according to population.

Each of these canvassing districts has been allotted a certain amount in Victory Bonds to sell. To win the Prince's Flag, therefore, a district has to sell its allotment. That is the one and simple condition.

Anticipating that many districts will buy far beyond their allotment, the organization decided that for each twenty-five per cent. excess of the quota one Prince of Wales' Crest be awarded. Thus the workers in a district doubling its quota will be the proud winners of four small crests for their Honour Flag. These crests will be sewn to the flag. The Prince's Crest—

the three ostrich plumes—is shown at the top of the coat of arms.

To every organization with fifty or more employees, where seventy-five per cent. of the enrollment invests a total of ten per cent. of the annual payroll in Victory Bonds, a supplementary Prince of Wales Flag in smaller form—48 inches by 34 inches—will be awarded.

The allotment for each district has been carefully considered, and is based on a conservative estimate of the purchasing power of the district.

Your district can sell its allotment and thus win the Prince's Flag, provided each person does his or her share.

You will gladly do your part and encourage your neighbour to do his.

Remember YOUR purchase may be the one that decides whether or not your district is to be the proud possessor of the Prince's Flag.

**The Prince's Motto is "I Serve"
Will You also Serve?**

Natural Salt Beds in Alberta

Drilling for salt at Fort McMurray, Alberta, has just been commenced, according to an official of the Department of Mines.

An outfit, with seven men, has just been sent in by the Provincial Government. The deposit underlies the town of Fort McMurray, so is feasible from the transportation standpoint.

According to previous investigations, there is a bed 180 feet deep, lying 480 feet under the surface. Professor Allan, of Alberta, was sent in by the Provincial government a couple of months ago, and he reported very favourably.

It is not decided whether the government will mine salt, supposing everything is as expected, or whether it will turn the work over to a company.

Amber Monopoly Gone

Amber is Lithuanian. The Lithuanian shore of the Baltic Sea is the only district in the world where the collecting and digging of amber is a practical industry. Practically all the products of amber—the necklaces, cigarette and cigar holders, buckles, buttons, pipe stems and hatpins, which are seen every day in the shops of the world—ate really Lithuanian in that they came from Lithuanian soil.

During modern years this industry has been closely guarded as a Prussian government monopoly. In the future, with Lithuania a republic, this industry can be greatly expanded with considerable profit, despite the fact that amber is one of the few things in the world which has diminished in value during recent years.

Baltic amber is not only collected along the shore, but it is mined from the so-called "blue earth" layers of the tertiary period well into the interior of Lithuania.

Excavations in Greece, Italy and Egypt have shown that Baltic amber was famous hundreds of years before the Christian era. Herodotus wrote of it, and beads, which the ancient Lithuanians must have bartered, were discovered in the (treasure rooms of Mikeni), dating back to 1,500 B.C.

One More Effort

Far beyond the expectation of the Empire and the world, Canada fought and strove and paid gallantly for five years. Indeed it may be doubted if any nation Canadian witnessed the notable effort of the Dominion without amazement. The true spirit of the people was not understood until the guns began to speak in Belgium.

It rose, month by month, to greater, and still greater heights. The double climax came in the autumn of 1918 when the Canadian Corps marched from Cambria to Mons, and when the nation subscribed \$610,000,000 for Victory Bonds.

In the war Canada found herself. The name "Canadian" is respected the world over; not only in the nations allied with the British Empire in the defence of liberty, but in Germany itself.

The fighting is over. The great task of dearticulating the organization built by four years of ardent effort is almost complete. The work of maintaining the Army until it is fully reorganized, and of fulfilling completely the national obligations to the soldiers has added much to Canadian War expenditure.

For that reason there is instant need of a new Victory Loan. The patriotic people whose ardour and energy brought Canada into the sunlight are asked to keep the Dominion there by buying Bonds. The honor of the nation is involved in the success of the Loan. The people who supported the soldiers constantly while they were in Flanders will not fail in one particular to continue that support until the men are re-established in profitable civilian occupations.

Considering the achievements of this proud people, there is reason for the belief that the success of this latest Victory Loan will be instant and overwhelming. But all citizens must have a part in it. It is not a task to be half-done by the whole people, or wholly done by half the people. Let every citizen subscribe!

Lost.—One Bay Mare with white face, 3 years old, no brand, also one Grey Mare 2 years old, branded FIV on left shoulder. One Bay yearling Gelding, branded FIV on left shoulder. Anyone knowing the whereabouts of the above will be rewarded for information leading to recovery. Phone 903 V. Patmore.

A Pimple Remover That Never Fails

Dr. Hamilton Stands Behind His Formula

Bad blood is always responsible for pimples, blackheads and humors. Pimples, eczema and boils are the common result.

I contend that to cure these ills, the liver, kidneys and bowels must receive attention.

My remedy, known as Dr. Hamilton's Pills of Mandrake and Butternut, invariably reaches the trouble.

For putting life into sleepy organs, for forcing out every kind of waste and foreign matter, for making health-sustaining blood, where can you find such efficiency as in Dr. Hamilton's Pills?

In a thousand cases I have demonstrated that Dr. Hamilton's Pills cure facial blemishes and skin diseases.

I took upon these pills as the best blood purifier and system builder of the age, and guarantee they will cure every complaint having its origin in a weak or debilitated blood supply.

If Dr. Hamilton's Pills will not cure that tired, run-down condition, if they will not change lack of force into energy and vim, then nothing will.

By creating an abundant supply of rich, nourishing blood, I can guarantee that standard of health so much desired by those participating in the strenuous life we live today.

Get Dr. Hamilton's Pills and prove their merit today, 25c per box.

THE COW PUNCHER

— BY — ROBERT J. C. STEAD

Copyrighted, Canada, 1918, By The Mazon Book Co., Ltd., Toronto. Printed By Special Arrangement.

(Continued.)

A light of satisfaction was in his teacher's eyes as Dave made this answer. Mr. Duncan had realized that he was starting late with this pupil, and if there were any short cuts to education he must find them. So he had set out deliberately to instill the idea that education is not a matter of schools and colleges, or courses of reading, or formulae of any kind, but a matter of the five senses applied to every experience of life. And he knew that nothing was so common as common that passed through Dave's hands. Coal had ceased to be a smutty mineral, and had taken on talismanic qualities unguessed by the mere animal workman; and sugar, and coffee, and beans, and rice, and spices, each would open its own wonderful world before this young and fertile mind. As a heritage from his boyhood on the ranges, Dave had astonishingly alert senses; his sight, his hearing, his sense of smell and of touch were vastly more acute than those of the average university graduate. . . . And it was that were true, might it not fairly be said that Dave was already the better educated of the two, even if he, as yet, knew nothing of the classics?

As Dave parted from the McFarland gang he felt that he knew what Mr. Duncan had meant by the dead-line. These were men who would always shovel coal, because they aspired to nothing better. There was no atom of snobbery in Dave's nature; he knew perfectly well that shovelling coal was quite as honorable and respectable a means of livelihood as managing a bank, but the man who was content to shovel coal was on the dead-line. . . . And, by the same logic, the man who was content to manage a bank was on the dead-line. That was a new and somewhat startling aspect of life. He must discuss it with Mr. Duncan.

Dave's energy and enthusiasm in the warehouse soon brought him promotion from truck hand to shipping clerk, with an advance in wages to

sixty-five dollars a month. He was prepared to remain in this position for some time, as he knew that promotion depends on many things besides ability. Mr. Duncan had warned him against the decision that life is entirely master of his destiny. "Life, my boy," he had said, "is fifty per cent. environment and forty per cent. heredity. The other ten per cent. is yours. But that ten per cent. is like the steering gear in an automobile; it's only a small part of the mechanism, but it directs the course of the whole machine. Get a good grip on the part of your life you can control, and don't worry over the rest."

To economize both time and money, Dave took his lunch with him and ate it in the warehouse. He had also become possessed of a pocket encyclopedia and it was his habit to emmentate saved by eating lunch in the warehouse. In reading from his encyclopedia, "I chanced one day that it was reading in the noon hour Mr. Trapper, the head of the firm, came through the warehouse. Dave knew him but little; he thought of him as a stern, unapproachable man, and avoided him as much as possible. But this time Mr. Trapper was upon him before he was seen.

"What are you reading?" he demanded. "Yellow backed nonsense."

"No, sir," said Dave, rising and extending his arm with the book.

"Why, what's this?" queried Mr. Trapper, in some surprise. "Tea—tea—oh, I see, it's an encyclopedia."

What is the idea, young man?" "I always like to read up about the stuff we are handling," said Dave.

"It's interesting to know all about it; where it comes from, how it is grown, what it is used for, the different qualities, and so forth."

"I'm," said Mr. Trapper, returning the book. "No doubt." And he walked on without further comment.

But that afternoon he had something to say to his manager.

"That young fellow on the shipping desk—Hiden, I think his name is. How do you find him?"

"Very satisfactory, sir. Punctual, dependable, and accurate."

"Watch him," said Mr. Trapper.

The manager swung around in his chair. "Why, what do you mean? You haven't occasion to suspect—"

Mr. Trapper's customary sternness slowly relaxed, until there was the suggestion of a smile about the corners of his mouth, and rather more than a suggestion in the twinkle in his eye.

"Do you know what I caught that young fellow doing during noon hour?" he asked. "Reading up the encyclopedia—on tea. Yes, mind you. Said he made a practice of reading up on the stuff we are handling. We mind you. Found it very interesting to know where it came from, and all about it. I've been in the grocery business for pretty close to forty years, and I've seen many an employee spend his noon hour in the pool-rooms, or in some other back room, or just smoking, but this is the first one I ever caught reading up the business in an encyclopedia. Never read it that way myself. Well—you watch him. I'd risk a ten-spot that he knows more about tea this minute than half of our travellers."

But Dave was not to continue in the grocery trade, despite his reading of the encyclopedia. A few evenings later he was engaged in reading in the public library; not an encyclopedia, but Shakespeare. The encyclopedia was for such time as he could save from business hours, but for his evening reading Mr. Duncan had directed him into the realm of fiction and poetry, and he was now feeling his way through Hamlet.

From the loneliness of his boyhood he had developed the habit of talking aloud to himself, and in abstracted moments he read in an audible whisper which impressed the substance more deeply on his mind, but made him unpopular in the public reading rooms. It was well known among the patrons of the rooms that he read Hamlet. This fact, however, may not have been altogether to Dave's disadvantage. On the evening in question an elderly man engaged him in conversation.

"You are a Shakespearean student, I see?"

"Not exactly. I read a little in the evenings. But I haven't gone far enough to call myself a student."

"I have seen you here different times. Are you well acquainted with

CUTICURA HEALS RASH ON CHILD

On Body and Face. Red and Itchy. Cried For Hours. Lasted a Year.

"A rash started all over my little girl's body, and she had some on her face. It started in a simple rash that was full of water, and it got red and itchy. She cried for hours. That trouble lasted a year."

"Then I started with a free sample of Cuticura. Soap and Ointment. I bought more, and I used four cakes of Soap and three boxes of Ointment which healed her." (Signed) J. E. Dora Langley, 1032 Ontario Street, St. Louis, Mo., August 11, 1918.

The Cuticura Toilet Tissue Containing of Soap, Ointment and Talcum is an indispensable adjunct of the daily toilet in maintaining skin purity and skin health. Free sample each of Cuticura Soap, Ointment and Toilet Tissue. Write to: Cuticura, P. O. Box 103, St. Louis, Mo., U. S. A. Sold everywhere.

the town?" "Pretty well," said Dave, sensing that there might be a purpose in the questioning.

"Working now?" Dave told him where he was employed.

"I am the editor of 'The Call,'" said the elderly man. "We need another man on the street; a reporter, you know. We are paying twenty dollars a week for such a position. If you are interested you might call at the office tomorrow."

Dave hurried with his problem to Mr. Duncan. "I think I'd like the work," he said. "I am not sure whether I can do it. My writing is rather—wonderful!"

Mr. Duncan turned the matter over in his mind. "Yes," he said at length, "but I notice you are beginning to use the typewriter. When you learn that God gave you ten fingers, not two, you may make a typist. But there is nothing more worth while than being able to express yourself in English. They'll teach you that on a newspaper. I think I'd take it."

"Not on account of the money," he continued, after a little. "You would probably soon be earning more in the wholesale business. Newspaper men are about the worst paid of all professions. But it's the best training in the world, not for itself, but as a step to something else. I have often wondered why editors, who are forever setting every other phase of the world's work to rights, are content to train up so many thousands of bright young men—and then pass them along into other businesses where they are better paid. But the training is worth while, and it's the training you want. Take it!"

Dave explained his disadvantages to the editor of "The Call." "I didn't want you to think," he said with great frankness, "that because I was reading Shakespeare I was a master of English. And I guess if I were to write up stuff in Hamlet's language I'd get canned for it."

"We'd probably have a deputation from the Moral Reform League," said the editor, with a dry smile. "Just the same, if you know Shakespeare you know English, and we'll soon break you into the newspaper style."

So, almost before he knew it, Dave was on the staff of "The Call." His beat comprised the police court, fire

department, hotels, and general pick-ups. And the very first day, as though to afford fuel for his genius, a small fire occurred in a clothing store.

"So good for two sticks—about four inches," said the editor, when Dave had given him the main facts. "Write your story to fit."

Dave suddenly realized that, although he had been a persistent reader of newspapers during the recent months, he had scarcely the remotest idea of how many words went to a column, or to an inch. It was a piece of information needed at once, so he set about to count the words in a column. Then he wrote his story to fit. He had already learned that everything in a newspaper office, from a wedding to a ball game, is "a story." When he turned his in it looked like this:

The fire bell was heard ringing this morning about ten o'clock, and soon after crowds were seen wending their way to the Great West Clothing Store. There, a heavy black smoke coming from the back end of the store, the firemen were late in getting there, and before they arrived a man had got badly choked by trying to go into the store. Presently the engine came up and before long water was being applied in great quantities, and soon the fire was under control. Part of the roof fell in, and the building is pretty badly ruined. Some of the contents may be fit for sale. It seems too bad that the fire engine should have been so long in coming, as without doubt if it had been there, the fire could have been put out before much damage occurred. However, it might have been worse, as it was a frame building, in a row of other frame buildings, and if the fire had once got beyond control much damage might have been

A FREE BOX

Here's a chance to prove to your own satisfaction, and at our expense, that Zam-Buk does end pain and heal sores and skin diseases.

SHOULD BE IN YOUR HOME

done. Nobody seems to know how the fire started.

It was with much quiet excitement that he awaited the appearance of the evening edition. He had a strange eagerness to see his contribution in print; a manifestation, no doubt, of that peculiar trait in human nature which fills the editorial waste basket with unaccepted contributions.

(To Be Continued.)

France Lives!

The announcement that "national" clothing to be put on sale in France to reduce the cost of living is not more interesting than the statement that the cloth is to come from the reconstructed mills a Roubaix, in the invaded district, near the Belgian border. France is recovering from the Buffalo Express.

Give her BOVRIL

Bovril is one of the most precious food substances in the world. Its beneficent effects are immediate; it acts like a glass of champagne, but without the reaction which wine sometimes brings. Bovril does permanent good by building up the very fabric of the body.

To get the full benefit of Bovril, take it regularly day after day. The value of "a course of Bovril" has been scientifically demonstrated by the independent investigations of Professor Thompson.

After bringing human subjects to a constant weight on a standard diet, he added Bovril to the other food, and found the body-building powers of Bovril to be 10 to 20 times the amount taken.

Body-building Power of Bovril taken alone.

S. O. S.

If Constipated, Bilious or Headachy, take "Cascarets"

Sick headache, biliousness, coated tongue, or sour, gassy stomach—always trace this to torpid liver; delayed, fermenting food in the bowels. Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely straighten you out by morning. They work while you sleep.

LICENSED AUCTIONEER

The undersigned who conducted over 20 successful sales last year, wishes to notify the Farmers and general public of the Crossfield district that he is open for engagements for

Any Kind of Auctioneering
in any part of Alberta.

Will call at the Farms for listing Sales at any time.

Electric Starting and Lighting

Leslie Farr, Dealer, Airdrie.

Facts of Interest to Cochrane Electors.

Farmer Stewart as Premier of this Province is not asking the support of the Electors merely on promises as to the future. He points to the record of the past and frankly asks the judgment of the Electors on such legislation as the following:—

The Farm Machinery Act.
The Co-operative of Elevator Act.
The Direct Legislation Act.
The Co-operative Associations Act.
The Agricultural School Act.
The Stock Encouragement Act, known the "Cow Bill."
The Woman's Suffrage Act.
The Volunteer and Reservist Act.
The Soldiers Home Property Exemption Act.
The Hail Insurance Act.
The Seed Grain Acts.
The Mothers' Allowance Act.
The Mental Defectives Act.
The Advanced Educational Legislation.

The many Acts tending to protect and improve the Public Health, including:—

The Municipal Hospital Act, and
The Public Health Nurses Act.

Ask the Executive of the U.F.A., or the Secretaries of the Urban and Rural Municipal Associations and all such officials. The answer is the same, **WE HAVE NO FAULT TO FIND WITH THE STEWART GOVERNMENT.**

H. W. Wood, President
of the U.F.A., at Crossfield:—

"I have the greatest respect for Premier Stewart, whom I believe to be a clean, honest, upright man, doing all he can for this Province."

Mrs. Parly, President
of the U.F.W.A., at Crossfield:—

"I have nothing to say against our present administration, I admire Premier Stewart as a sincere and honest man, doing the best he humanely can in a very difficult position, and I admit that the Government has passed much good legislation for the farmers, some of it asked for and some passed without being asked for."

Roderick McKenzie,
Vice-President Canadian Council of Agriculture:—

"Concerning the next Provincial Election I do not anticipate that a Candidate of a Farmers' Party will be placed in the field, as in the three prairie provinces the Provincial Governments are in closer touch with the farmers than was the Hearst Government."

Mr. Moore says that farmers are not represented in the Legislature, in proportion to their number, he says that farmers are 41 per cent of the population. There are 34 Liberal members in the Legislature, 41 per cent of 34 is practically 14. The following 14 Liberal members are actually bona fide farmers:—

Frank Walker, M.P.P.
Hon. A. J. McLean, M.P.P.
Hon. Charles Steward, M.P.P.
Frank Leffingwell, M.P.P.
J. A. McColl, M.P.P.
Major R. B. Eaton, M.P.P.
Gordon McDonald, M.P.P.
J. J. Gaetz, M.P.P.
Joseph McCallum, M.P.P.
Andrew Shandro, M.P.P.
Harry Atkins, M.P.P.
Dan Morkenberg, M.P.P. (dairying)
Andrew Prudden, M.P.P.

This makes the 41 per cent on the Liberal side. In addition to this a large percentage of the remaining Liberal members such as Hon. C. R. Mitchell, Hon. A. G. McKay, S. G. Tobin, M.P.P. Dr. State, M.P.P., Martin Woolf, M.P.P. and others are conducting farming and ranching operations.

It is noticeable that of the five members sitting on the cross benches there is only one farmer, namely James Weir, M.P.P.

Move to Regulate Price of Clothing

Toronto.—Immediate and effective action to regulate clothing prices was forecasted by Commissioner Murdoch of the Commerce Board, at the conclusion of the board's investigation into clothing prices here. Col. W. H. Price, government counsel, had addressed the commissioner, calling attention to evidence which he said warranted action on the part of the board, and Commissioner Murdoch replied:

"I am firmly convinced that something should be done to reduce the price of clothing, and so far as I am concerned, as one member, I will hope to see something done promptly and effectively."

Commissioner Murdoch said he concurred in Col. Price's declaration that there had been too much profit made by some of the clothing houses whose affairs had been investigated. "And I am further of the opinion," he went on, "that there is more than net profit involved, that there is real net profit to some extent hidden in certain other items referred to in a general way as overhead. I think the people of the country demand, and are entitled to, a change in the situation."

Later on the chairman suggested: "If the business houses generally have been to some extent under investigation will co-operate with the board themselves, and at the same time co-operate with the public and in the interest of their customers, we may go some reasonable distance toward the desired end of correcting the existing situation at this time."

Col. Price, in summing up the clothing situation as revealed in the investigation here, referred to the big profits made by the manufacturers and dealers, and said to Commissioner Murdoch:

"You will notice that the cost to the consumer is, in nearly every case, nearly 100 per cent. over what it cost to produce the article."

California to Entertain King Albert

MONTREAL.

Prohibition in Norway

Despite This, Arrests for Intoxication Have Been Increasing

Christiania.—War-time prohibition, operating since December, 1916, and forbidding the sale and private importation of spirits and strong liquors has been made permanent.

Despite this prohibition, arrests for intoxication have been steadily increasing throughout the country, and in some places have been higher than before the war-time prohibition was put into effect.

Substitutes for liquor, especially denatured alcohol, are being used everywhere. Illegal distillation also is increasing, especially in the rural districts.

It is feared that France, Spain and Portugal, from which countries liquor was imported, may retaliate with a tariff on Norwegian products, such as timber and fish, thereby injuring especially the Norwegian fish trade, 60 per cent. of which goes to Portugal.

GET SLOAN'S FOR YOUR PAIN RELIEF

You don't have to rub it in to get quick, comforting Relief

Once you've tried it on that stiff joint, sore muscle, sciatic pain, rheumatic twinges, lame back, you'll find a warm, soothing relief you never thought a liniment could produce.

Went's stain the skin, leaves no mess, wastes no time in applying, sure to give quick results. A large bottle means economy. Your own or any other druggist has it. Get it today. 35c, 70c, \$1.40. Made in Canada.

Nationalists Capture Konieh

Apprehension That Turkish Threat May Be In Danger

Paris.—Konieh, an important railroad centre, is in the hands of the Turkish Nationalist troops.

This city, which in the days of Roman power was known as Iconium and was the capital of the province of Lycaonia, stands in a position which virtually dominates South Asia Minor. Its capture appears to indicate that Mustafa Kemal is in control of the vast region stretching from Konieh from the southwest to Erzerum, the principal city of Turkish Armenia, a distance of 425 miles.

It is said the fall of the Turkish cabinet was caused by the capture of Konieh, and there seems to be some apprehension in some quarters that the Turkish throne may be in danger.

On the other hand, French circles point out that Djemal Pasha, the newly appointed Turkish minister of war, is a political ally of Mustafa Kemal.

Great Britain began to withdraw her troops from Armenia in August, and it is probable this movement is now far advanced. France has forces in Syria, while Greece and Italy have small detachments at various points along the coast of Asia Minor.

None of these nations, however, appears to have sufficient forces to conduct a campaign in the interior of the country. Great Britain's army in Mesopotamia and in Palestine, to the east and south, seems to be too far away to menace the spread of the Turkish nationalist movement, led by Mustafa Kemal.

Steamers for Ireland
London.—The Cork Development Association has received a cablegram from Henry Ford stating that he is considering running a line of steamers to Ireland.

W. N. U. 1265

Concerning Shipping Supervision

Co-operation to Be Introduced in Control of Ocean Tonnage

Ottawa.—Replying to a question by J. E. Armstrong, Sir George Foster, Minister of Trade and Commerce, stated that the Dominion Government has called the Imperial Government's attention to injustices in connection with the supervision by the British Ministry of Shipping in the employment of vessels under charter by Canadian shipping interests.

In reply to another question, Sir George stated that the Canadian Government will co-operate with the Imperial Government and other overseas dominions in considering the question of the supervision and control of ocean tonnage between the different parts of the British dominions.

In reference to a report of a British royal commission in favor of government supervision in trans-Atlantic shipping, the minister stated that this report will probably form the subject matter of consideration at the next Imperial conference.

Will Investigate Irrigation in West

Ottawa.—The agriculture committee of the commons recently gave consideration to the question of irrigation in the dry areas of the prairie provinces. During the discussion the important announcement was made by Professor J. A. Giesdale, Deputy Minister of Agriculture, that the Department of Agriculture, realizing the importance of this matter, is undertaking to carry on a thorough enquiry into the whole question, which may lead to important results.

Italy Ratifies Peace Pact
Rome.—King Victor Emmanuel has ratified the German and Austrian treaties by decree.

The Giornale d'Italia says that each decree contains two articles, the first authorizing the government to execute the treaty fully and the second setting forth that the documents be presented to parliament to be converted into law.

Third Dose Relief! Fifth Dose! Diarrhoea Stopped.

Diarrhoea does not need to persist for any length of time until the whole system is weakened and debilitated. No other disease so quickly undermines the strength and brings about a condition of prostration and very often total collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effectual in checking the diarrhoea, but at the same time acts as a stimulant, strengthens the heart and braces up the whole system, and one of its principal points is that it does not leave the bowels in a constipated condition.

Mr. W. H. Arnold, Fort Qu'Appelle, Sask., writes: "A few years ago while out shearing, I had a severe attack of diarrhoea. Nothing I took seemed to do me any good. I was getting worse all the time. Hearing that Dr. Fowler's Extract of Wild Strawberry was good for diarrhoea, I went into town and procured a bottle. After the third dose I felt relief, and after I had taken the fifth dose the diarrhoea had stopped. I always keep it in the house, and would not be without it."

See that you get the original "Dr. Fowler's." It has been on the market for the past 74 years. Substitutes may endanger your health. Price 35c. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Ready to Ratify Pact

London.—Great Britain's ratification of the Peace Treaty, the Foreign Office says, awaits only the King's proclamation. All the dominions have ratified the treaty, the Australian House on September 15 and the Senate on October 15.

Increased Gratuities A Heavy Burden

For Sweeping Reform

Views on Many Subjects

Calgary.—Resolutions asking that second offences for bootlegging be punishable by jail sentences, that equal parental rights be established in the province, that widows be given greater power under the Dower Act, that a living wage be incorporated in the Factories Act, that hotels and lodging houses be licensed to bring them under police regulation, and that marriage licenses be issued only from courthouses by responsible parties and that the lists be published every day, were passed by the provincial executive of the National Council of Women, which met here recently.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

"Accept 'California' Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say 'California.'"

Heavy Expenditures

Deputy Minister of Finance Submits Figures to Committee on Soldiers' Civil Re-establishment

Ottawa.—A presentation of the government's obligations in regard to the payment of perhaps \$200,000,000 re-establishment grant in addition to the burdens already to be borne, was given to the special committee on the soldiers' civil re-establishment by T. C. Boyle, deputy minister of finance.

Since March 31, 1914, the public net debt has increased \$80 per cent. from \$335,996,000 to an estimate for 1919-20 of \$1,950,000,000. Pensions are estimated this year at \$30,000,000; land settlement, \$25,000,000; and soldiers' civil re-establishment, \$10,000,000. Interest on the public debt has risen from \$12,093,000 in 1913-14 to \$102,762,000 this year.

War expenditures for 1919-20 were estimated at \$350,000,000 exclusive of pensions, and this year's consolidated revenue receipts were estimated at \$344,000,000.

King Albert Runs Train

Chicago.—The King of the Belgians ran the engine of his own train for ten miles. The special train on which the King and his party are travelling westward was stopped at Wauson, Ohio, while His Majesty climbed into the cab of the engine and took over the throttle from the grimy pilot. The King, who has a thorough knowledge of locomotive engineering, ran the heavy train for 10 miles without a jolt, then he stopped the engine and returned to his car.

Irish Home Rule Bill

London.—Parliamentarians say the Irish bill will be the feature of the new session of parliament, and the cabinet is now considering one drafted on lines of dominion home rule, but with suggested alterations that any county may stand out or Ulster counties be all included and have their own secretary of state.

Ottawa.—A further statement of the difficulties facing the government which make payment of \$200,000,000 or more in gratuities a difficult matter for the administration to face, was placed before the special committee on soldiers' civil re-establishment by Sir Thomas White, former minister of finance.

The former minister of finance was calling attention to the many heavy expenditures which the government was called upon to face from the forthcoming Victory Loan. Without any new debt incurred, the major portion of this loan would be taken up in bank debt and other obligations.

"Canada's financial position," he said, "while it should not be called critical, is still serious because of five years' war expenditure to call for most careful administration."

"The policy of all the nations which were belligerents will be toward retrenchment for the next few years."

In regard to the forthcoming loan, Sir Thomas said he had no misgivings. It would probably be well over-subscribed, but he could see that, from present indications, a further loan would be necessary next year. Canada had had to borrow money to finance purchases by Britain and her allies in order that Canada's own trade might not suffer.

"I do not see how it would be possible for the government to raise any such further sum as is suggested if its credit is to be maintained," said Sir Thomas. The ex-minister expressed the view that should the government decide to grant a large amount of additional aid to soldiers, the money would mostly have to be produced by domestic loans.

Bulgaria Seeks Time Extension

Paris.—The supreme council will meet to reply to the request of Bulgaria for an extension of ten days to the time granted it for presentation of its observations on the treaty handed to the Bulgarian commissioners September 19.

Ex-Kaiser Moving
Amsterdam.—The former German emperor will remove from Amersfoort after December 16, and take up his residence at Doorn.

A cool, clean shave for 1/5 of a cent!

A cool, clean, satiny shave for 1/5 of a cent—think of it! At least 500 shaves are obtained from 12 AutoStrop blades, and you often get more than that.

Just a turn or two on the strop and your AutoStrop Razor is ready. After shaving, you press a little lever, put the blade under the tap, wipe it off, and it is ready for the next shave. There is no need to take the razor to pieces and assemble it again; simply leave the blade where it is from start to finish. This means time saved in the morning rush—and a razor blade that's good for about six weeks' clean, cool shaves.

Razor—Strop—12 blades—\$5

AutoStrop Building, Toronto, Canada

The Use Of Coarse Grains

People Consume Too Large a Proportion of Refined Material

The public must necessarily judge food very largely by the eye. Green colored apples are difficult to sell, even when of fine quality, but a red apple will usually bring a good price, even though the actual flavor may be but little better than a turnip. Rice, in order to make it attractive, has to be coated with glucose and powdered talc, by which it gets its fine gloss. Butter must be yellow to please the purchaser and is therefore frequently colored with a yellow dye. But the public demands wheat flour in as white a form as possible, and hence it has often been bleached to remove its natural yellow tint. In Bulletin No. 40, "The Use of Coarse Grain for Human Food," which may be had free upon application to the Publications Branch, Department of Agriculture, Ottawa, it is shown that with the advance of civilization and the improving of machinery there has been a tendency to discard the coarse and relatively indigestible substances in our food, with the result that we have reached a stage where most people consume too large a proportion of refined material and too little of the necessary coarse and relatively indigestible substances. Lately, however, people have become alarmed and action has been taken against what may be fairly called "over-refinement of foods." The object of the new bulletin is two-fold: first, to show to farmers generally how they can become more nearly self-sufficient, as far as the food supply for themselves and their family is concerned; second, to point out for the benefit of other classes of people some ways of economizing in the cost of their food, and at the same time improve the wholesomeness of their diet.

Livestock Market

Short Production a Very Dangerous Policy for Canada to Adopt

H. S. Askell, Livestock Commissioner, who has recently returned from a trip to Europe, where he has stated his views regarding the position of the Canadian packers, reviewed in the October number of the Agricultural Gazette. He states that the London agents of our Canadian packers reviewed in disappointment the orders for Canadian goods—bacon, eggs, etc.—and that they could obtain but a tenth of the product they required. The unwarranted high price of hogs in Canada during the past month is but a reflection on the reputation of Canadian goods as compared with American, and demonstrates the effort of our packers to maintain their connection with old established clients in the face of short supplies. Since Denmark within a year will again be a factor on the bacon market, our only security for the future is full production and such a substantial export supply as must command recognition by its volume and quality. Short hog production is unquestionably the most dangerous policy Canada can adopt. This is true of eggs as well as bacon.

Must Get Back to Work

It is exceedingly difficult to get out of the mood of war, out of hatred, and the desire for destruction, into the mood of peace, constructive effort, and obedience to law. But it must be done. The world must get back to work, and to thoughts and habits of peace. That does not mean that we can return to the old conditions. There are social injustices which must be remedied, and those who do the hard work of the world must be assured that they will be fairly rewarded and their service fully recognized.—From the Toronto Star.

Cattle Bring Top Price

Regina.—A recent shipment of 42 head of cattle from the Thunder Hill Indian reserve elicited favorable comment and sold at the top price on the Winnipeg market. Inquiry was made as to the method of feeding. The reply forwarded was that the cattle never saw the inside of a stable in their lives and their condition was due solely to natural pasturage. Eight head of beef steers included in the shipment averaged 1,680 pounds each.

Russian Thistle In Manitoba

Immediate Action Will Clean Up Many Patches

Winnipeg.—A weed that is spreading fast in Manitoba is the Russian thistle. This is an annual plant, very soft, dark green in its leaves and innocent looking when young, but developing short, sharp, stiff spines in tremendous numbers at the latter end of the season. The stems of the plant are yellow or grayish striped lengthwise with very pronounced red stripes. While young and green, this weed looks more like the Kochia, or Burning Bush, grown as an ornamental plant in gardens, than anything else.

The Russian thistle grows late in the season. Where it has plenty of room, it will be a foot or more high by the middle of July, but in most cases where it is growing in a crop of grain it does not develop very greatly until the crop is cut; then being still green and just at the blossoming stage, it grows very fast, and if given a chance, ripens a great lot of seeds among the stubble. When the crop comes, the plant breaks off the ground and rolls all over the ground, scattering seeds as it goes. By October many of these plants are two or three feet across, exceedingly branched, and full of ripe seeds.

The flowers are not conspicuous enough to attract the attention of an average person. They are placed where the leaves attach to the stems.

The weakness of this weed is its lateness of ripening seeds. A disk following the binder when cutting would destroy a large number of them, as the plant is just beginning to flower when harvest commences. Early skin plowing would bury the plant before it had ripened any quantity of seed.

The Russian thistle is very bad in parts of North Dakota, and is thickly distributed in the southwestern part of Manitoba, with considerable numbers around Brandon and other points along the C.P.R. main line. At several points it has gone farther northward, and is well distributed about Gladstone and towards Lake Manitoba.

Immediate action will clean up many of the patches that have grown this year, and if cut and burned or plowed under at once they would do much less harm than otherwise. The great damage occurs when the plants are allowed to break off and roll about the country.

The Russian thistle belongs to class 1 as defined in the Noxious Weeds Act, and all weeds inspectors have power to prosecute persons who permit patches to go to seed upon their property.

The value of vigorous cultivation right after harvest cannot be overestimated.

Curious Wagers

Break Bets Appear to Be Less Common Now Than in Olden Days

Curious wagers are less common today than they were in earlier days, when men would undergo personal humiliations and discomforts to win a purse. "One of the strangest is that regarding Lord Digby, in 1670, when he walked five miles around Newmarket Heath in a certain time, barefooted and naked, while the King and his court watched him. Lord Digby lost the wager by a margin of half a minute.

In the eighteenth century a Liverpool scientist bet a brother scientist that he could read a newspaper by the light of a farthing dip at a distance of 30 feet. The scientist performed the feat by coating the inside of a shallow wooden box with sloping pieces of looking glass. The idea led to the modern reflected light system.

Another example of a curious wager was that of a Liverpool cotton broker who, on a bet, wore a pair of wooden shoes to the Cotton Exchange.

The limit in feature wagers was possibly reached by a man in a small town who propelled a green pea with a pocketbook for about 80 yards along the pavement within half an hour, the stipulated time, and won his wager.

If you have occasion to gather thistles, here a substitute.

Tree Planting On The Prairie

Committee Formed for the Purpose of Promoting the Planting of Trees

Great interest is being shown in a movement for the planting of trees on the prairies of Canada. For many years the Dominion Government and the Canadian Pacific Railway have been encouraging the planting of trees by distributing, free of cost, young trees and cuttings to farmers who were ready and willing to take care of them. Many beautiful farm homes surrounded by trees testify to the value of this policy.

At the recent convention of the Western Canada Irrigation Association a very interesting paper was read on this subject of "Tree Growing on the Prairie Farms," and as the result of the subsequent discussion, a strong committee was formed for the purpose of further promoting the planting of trees throughout the country. It does not require a great deal of effort to plant trees on these prairie farms. The proper selection of trees and a little care and attention at the right time insures a very good growth, and in this respect the farmer who settles on the open prairie is really better off than he who settles in those districts that have to be cleared, for it is generally easier to plant trees just where they are wanted than to remove them from the places where they are not wanted. Moreover, the treeless land is productive immediately, while the other is not productive until it has been cleared.

An Opportunity For The Hog Raiser

Raising of Hogs Going to Be a Far More Profitable Business Than It Has For Some Time

The following item clipped from the "Live Stock Journal" of London, England, is enlightening:

"May I again remind the farming community that bacon and other pork products are getting dearer, and that the present and future of pig-breeding is still by far the brightest spot in agriculture, and, in addition, is the quickest to make money out of."

We want thousands of new pig-keepers, and particularly breeders, to meet even a tithe of pigs required, live and dead, at home and abroad.

Several signs indicate that the raising of hogs is going to be a far more profitable business than it has been for some time. The demand for pork and pork products on the other side of the water will continue to be very great. It will be a long time before the United States will be able to supply for all needs, and a large portion of them will continue to be furnished by pork products. Expert opinions from the other side are that prices will continue to give magnificent returns in this industry.

In Western Canada there is a wonderful opportunity for the hog raising industry. The farmer here has a great advantage over the farmer in other parts of the continent. Although it costs him no more to keep his pigs, the price on the markets here is in a position to raise hogs more economically than his competitors, because there are practically no hog diseases in this country, while the low-priced hogs obtainable in Western Canada are capable of producing immense quantities of meat.

A Large Flax Crop

One of the largest fields of flax in Alberta, in the whole of Western Canada, is that of the Great West Farm Company near Redlaw, in Southern Alberta. This field, on which the harvesters have been busy during the last two weeks, comprises 4,700 acres. The indications are that the yield will average from six to ten bushels to the acre, which, considering the extraordinary dry weather which prevailed in the middle of the summer, is a satisfactory yield for an acreage of this size.

The company owning this farm is headed by an Italian prince named d'Alro, in Calgary and Southern Alberta he is known as plain Mr. d'Alro.

The building of St. Peter's Cathedral in Rome was started in 1450, but was not entirely finished till 1880. It has been estimated that the total cost was not far from \$75,000,000.

Keeping Bees For Their Sting

Druggists Use These to Manufacture Formic Acid

A woman has found that it is more profitable to raise bees for their stings than for the honey they produce. During the last twenty-four years she has supplied druggists with fifty thousand stings a year. To produce these stings she keeps two colonies of bees, whereas it would require fifty colonies to produce an amount of honey of equal value.

The bees are gathered in an especially constructed box, and taken into a darkened room. Then, taking them up by their heads, the woman holds them under a magnifying glass, and extracts the sting with a pair of tweezers. The stings are placed in a dish of milk sugar, which prevents decay.

Druggists use these stings to manufacture formic acid. This is used by doctors to treat rheumatism and to restore circulation in cases of paralysis. Originally this acid was obtained by distilling common red ants (formica rufa), from which the name is derived.

Holsteins For Austria

Shipment Only First of Herd to Be Exported

The first Holstein cattle to be introduced into Australia were taken to Sydney, N.S.W., on the steamer Tahiti, which left Vancouver September 9th. Although only seven head are included in the shipment, they comprise only the first of what is expected to be a considerable herd, to be exported from the farms of British Columbia to the Government-supervised agricultural schools of Australia.

Mr. J. F. Simmonds, an Australian cattle expert, was delegated some time ago to arrange for the export of the cattle, and negotiations for the purchase were carried on largely through Dr. S. F. Tomin, Minister of Agriculture, and president of the Holstein-Friesian Association of Canada. A second shipment will be sent in March.

There are ten bull and six heifers in the shipment. The bull was purchased from Mr. Sayward's Saanich ranch. Three of the heifers were secured from Mr. G. T. Corfield at Duncan, and the other three heifers were obtained on the Mainland.

A "Health Town"

Expectations of Those in Charge of Plan Fully Realized

It is three years since the Metropolitan Insurance Company of New York gave the National Tuberculosis Society of the United States \$100,000 to establish a "health town" for the purpose of experimenting in the saving of life. The purpose was "to show that unnecessary sickness and death, particularly tuberculosis, can be eliminated by medical and nursing care, personal hygiene, and adequate health administration." To assist the experiment, the town of Framingham, Mass., which was chosen by the society, raised its own expenditure on health administration from 39 cents to \$1 for each inhabitant.

The more recent results of the Framingham effort have been made public, and they show that the expectations of those in charge of the plan have been fully realized. Before the experiment commenced, 121 persons in a town of 16,000 died of tuberculosis in the year. For the three years of the test the number of deaths was 79, 79, and 76, respectively. The death rate among infants has also been greatly reduced. No new methods were used in Framingham. Any town could do the same thing. Any calculation on the value of human life would show that it would pay. Ottawa Journal.

Hundred Bushels to the Acre

A yield of one hundred bushels per acre from an eighteen-acre field has been obtained by Mr. Fulton on his farm at Oakland, Manitoba. The land had received careful attention, but the total of 1,800 bushels was a surprise even to the producer. The oats are of the old-fashioned Banner variety. The land on this farm has been cropped for forty years, and a return of this quantity indicates the marvelous soil quality of the Prairie Provinces of Canada. The oats sold at Oakland on car at 82 cents per bushel.

Blind Visitors At Niagara

More Than One Hundred Men and Women Only Sensed Its Wonders

The strangest tribute ever paid to the splendor of Niagara was the visit of more than one hundred blind men and women, who came to see the wonder of the precipice, but who, at its wonders by that time, had no vision which comes at last to those who make their life's journey in the unending darkness.

Miss Rosetta M. St. John, of Detroit, conducted the party, and, enthralled by her vivid description of the scene. An artist who drew pictures on the spot, as the blind folk's hands almost touched the water, whispered a word of encouragement to those who were to follow. She led them to spots where the falls of Niagara were their check, and the winds of the cataract were their hair. The roar made the water tremble. "It's a terrible sound," the girls whispered. At the edge of the river, it sweeps past Goat Island, blind girls stopped and thrust their hands so that they could feel the rush of the current, the life of the falls. They picked stones out of the water to take home as mementos of that wonderful experience. Old men thrust in their canes and the swirl. All described the sensation as wonderful!

Future of Earl Haig

Field-Marshal Would Like to Become Commander-in-Chief in India

The future of Field-Marshal Earl Haig is said to be greatly existing the thoughts of the government. Given a free choice, the Field-Marshal would greatly like to become Commander-in-Chief in India, but the fact that he is now Colonel of the Royal Horse Guards rather complicates matters, since this appointment carries with it the office of General to the King, and as such it is necessary for the holder of it to be on duty once in every three months. It is now suggested that Earl Haig should retain his present appointment as Commander-in-Chief of the home forces. Probably this is what will eventually be done, but the government has so far arrived at no decision in the matter.

King's Discharge

Certificate Will Be Issued to All Discharged Soldiers

Ottawa.—The King's certificate of discharge will be issued through the Militia Department to all discharged soldiers who, after serving in a theatre of war, are as a result of disengagement in military service, discharged as medically unfit. It is also being issued to those who, while not serving in a theatre of war, were discharged as a result of disability caused by air raids, naval bombardments, etc. The certificate is a handsomely engraved document about 17 inches by 22 and will be distributed without being folded. Applications for them may be made on cards which are now available at the principal postoffices.

Auto Sleds for Snow Roads

Judging by the report of the performances of a new auto sled in the mountains near Seattle, the problem of travelling over snow by motor power has been solved by using the caterpillar traction found serviceable in adapting the motor-driven vehicle to farms and cattle-feds. Hitherto snow had presented a baffling obstacle to progression by motor; but the new auto sled is said to have operated successfully over snow-covered roads under the worst conditions likely to be encountered. An extended trip with three men and a full load is a test that seems reasonably promising of a new means of travelling in the land of the daisied.—Christian Science Monitor.

Some men wait so long to make sure that they are right that they never get ahead.

A wise woman never questions the age of a woman.

A Happy Family

BY DR. S. C. BOWEN.

A happy family is one that can sit down to the table with keen appetites and good cheer. Plenty of the out-of-doors and cleanliness, inside and outside of the body, will make for health, wealth and happiness. Your doctor will tell you that anything from a headache to the most serious illness may result from allowing food to ferment in the intestines. The first thing to do in case you feel mean, logy, dull, perhaps feverish, is to flush the liver and kidneys, drink plenty of water, and take a dose of castor oil, or, something better, made of May-apple, aloin and jalap, and long sold by almost every druggist as Dr. Pierce's Pleasant Pellets. This may save you from a fit of sickness, remove the poisons from the system and give the tissues of the body a chance to build up and resist disease.

People are realizing more and more that the kidneys, just as do the bowels, need to be flushed occasionally. The kidneys are an eliminative organ and are constantly working, separating the poisons from the blood. Uric acid backs up into the system, causing rheumatism, neuralgia, dropsy and many other serious disturbances.

This can be avoided by stimulating the kidneys to increased action, and because of its tonic effect on these organs I would advise any one to get Anuric (anti-uric acid) which is to be had nowadays for fifty cents, at almost any drug store.

Humiliating

George: I hear that your employees discharged you.
Daphne: Yes, but I wouldn't mind that so much if they hadn't added insult to injury.
George: How?
Daphne: They advertised for a boy to fill my place.—London Tit-Bits.

No More Asthma.—Dr. J. D. Kellogg's Asthma Remedy sounds the death-knell of this trying trouble. It stops the awful choking and painful breathing. It guards against night attacks and gives renewed ability to sleep and rest the whole night long. Much is claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma try it and convince yourself of its great value.

Probably you never heard of the man who was killed with kindness—but if you did it was nothing but hearsay.

DODD'S KIDNEY PILLS
FOR ALL KIDNEY DISEASE
BRIGHT'S DISEASE

23 THE PROPHET

A Musical Incident

The young lady attended a concert. As the violinist finished his solo she wept loudly. "Ah!" he said, "she is a lover of music." Realizing to her chagrin that "I understand," he said, "you have true appreciation." "Yes," she said, "you played grand. But I wept because I neglected to remove my dog's dinner from the stove, and I know it is ruined."

The Best Liver Pill.—The action of the liver is easily disarranged. A sudden chill, undue exposure to the elements, over-indulgence in some favorite food, excess in drinking, are a few of the causes. But whatever may be the cause, Farnell's Vegetable Pills can be relied upon as the best corrective that can be taken. They are the leading liver pills, and they have no superiors among such preparations.

She Wanted Progress

"No, sah, Ah don't neber ride on dem things," said an old colored lady looking in on the merry-go-round. "Why, de other day I seen dat Rastus Johnson git on an' ride as much as a dollah's worth an' git off at the very same place he got on at, an' sez to him, 'Rastus, I sez, 'you' spent y' money, but whar y' been?'"—Boston Transcript.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others. It works!

Ouch! P P P P! This kind of rough talk will be heard less here in town if people troubled with corns will follow the simple advice of this Cincinnati authority, who claims that a few drops of a drug called freezezone when applied to a tender, aching corn stops soreness at once, and soon the corn dries up and lifts right out without pain. He says freezezone is an ether compound which dries immediately and never inflames or even irritates the surrounding tissue or skin. A quarter of an ounce of freezezone will cost very little at any drug store, but is sufficient to remove every hard or soft corn or callus from one's feet. Millions of American women will welcome this announcement since the inauguration of the high heels.

Which Are the Seven Seas?

That there is magic and mystery in numbers is an ancient tale, and the fact is confirmed by a correspondent asking: "Which are the seven seas?" Upon inquiry, there appears to be a common consensus as to six of the seven, these six being the Atlantic, the Arctic, Antarctic, Pacific, Mediterranean, and "Indian." And just as the assistants, referred to on six, were divided upon the seventh, wonder of the world (some voting for the Pharos of Egypt, others for the Palace of Cyrus), so there is doubt as to whether the seventh sea be the Baltic or the North Sea.

To Dig Out

Prices Will Fall When Production Is Increased

There is only one sure way to cut down the cost of living. Prices will fall when production is increased. With larger supply of what everybody needs to eat, drink and wear and for shelter there will be concurrent drop of cost to the consumer. At the same time there is brought about an equivalent rise in the wages of labor. To stop work is to decrease production. Having endured the war we must now begin the work of repair. One little word of three letters shows the end of the woe of depression. That word is "dig."—From the Philadelphia Record.

The sneer of the jealous fool is apt to proclaim the wise man's merit.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles, and can be carried without fear of breakage.

She Let Him Choose

—She: What an atrocious recklessness! I wouldn't trust you to select any thing, you have so little taste.
He (chuckling): You forget that I selected you, my dear.
She: You think you did, but you didn't really.

RHEUMATIC PEOPLE

Can Only Find Relief By Enriching the Blood

Rheumatism is a disorder of the blood. It attacks people when the blood is overcharged with acids and impurities, thus setting up inflammation in the muscles and joints. Wet weather or cold weather of autumn may start the tortures of rheumatism, but is not the cause. The cause is in the blood and the blood only. Victims of this malady have every reason to fear the first dull ache in the limbs and joints, followed by sharp pains through the flesh and muscles; these are the symptoms of poisons in the blood which must be driven out. The victim is racked and tortured.

There is only one way to cure rheumatism, and that is through the blood. Liniments, hot applications, and rubbing may give temporary ease, but cannot possibly cure the trouble out of the system. That can only be done by the rich, red blood which Dr. Williams' Pink Pills actually make. This new blood drives out the poisonous acids and impurities, and the rheumatism disappears. If you are a sufferer from this painful malady begin curing yourself today by the use of Dr. Williams' Pink Pills, and see how soon the pains and stiffness of the joints fade away, leaving behind new energy and new health.

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail at 50 cents a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

The more a baker loafs the more bread he has to dispose of.

Soft corners are difficult to eradicate, but Holloway's Corn Cure will draw them out painlessly.

The man who is long on words is apt to be short on deeds.

Minard's Liniment Co., Limited.

HELP THE VICTORY LOAN

The Victory Loan campaign in Southern Alberta is going with a swing. Reports from the central committee in Calgary say that the capitalists have completed their organization and that the Loan is meeting with a far better reception than had been anticipated. There will be a great deal of honor in going "over the top" on this Loan and it is to be hoped that this district will do its share and will make at least as good a record as last year.

"Victory Loan 1919 is going to be very popular indeed. In the first place the security is excellent and the investment is a better one than will probably be available in government bonds after this occasion. To get Canada's bonded obligations bearing 5% per cent. interest at par is something that was not dreamed of before the war and will not be again. For this reason, there is little doubt that the bonds will go above par on the market almost as soon as they are issued, and that anyone who buys

them during the campaign will be able to sell them at a profit thereafter. That, at least, is the history of the previous bond issues and there is no reason why it should not be the history of this one.

Southern Alberta is especially interested in the success of the Victory Loan because the money is to be used for the re-establishment of our soldiers and the financing of crop and other similar payments. Being an agricultural country Southern Alberta will get more direct benefit out of a Victory Loan than most other portions of Canada and it is therefore the more her duty to support the loan to the best of her ability.

Organization and work are progressing in this district and in others and the general committee asks that the public assist their local canvassers in every possible way and especially by subscribing promptly and as largely as possible when the campaign will open on October 27 and continue till November 15.
